	Middle	-1.39	-0.75	-0.52
	Low	-0.97	-0.35	0.23

Although both attainment and progress 8 for our disadvantaged students is showing clear and sustained improvement, the basics figure in 2016 was disappointing, although set to improve in 2017. All indicators are improving for our disadvantaged students, however the progress needs to be more than expected for this group and as yet this isn't the case for all disadvantaged, this is a clear focus in our development plan for 2017. This year will show gains for disadvantaged students and PP focused work scrutinies carried out this term show significant improvement in students work marking and feedback. We have historically made more progress with lower ability disadvantaged students than our more able, although our basics data is stronger for the more able. Through more incisive intervention the more able disadvantaged are now a key focus group and are set to make the progress required for 2017.
